

Job Title: Embedded Systems Engineer

TELETEL SA, a leading company specializing in communication protocol testing products in the space, defense and aeronautics sectors in Europe & worldwide, is seeking for sharp, disciplined, and highly motivated embedded systems engineers with expertise in communication protocols development to get involved with highly challenging product development and integration tasks.

The basic skills that the ideal candidates should have, are:

- University degree
- Knowledge of C, C++ in embedded environments
- Experience with communication protocols development
- Embedded software development experience of at least 3 years
- Excellent working knowledge of the English language

Extra skills that will be considered as an advantage are:

- Experience/familiar with FGPAs, VHDL coding
- Experience with aerospace on-board communications (MIL-STD-1553, CAN, FlexRay, AFDX, TTEthernet, etc.)
- Experience with strict software development standards and practices
- Knowledge of Microsoft .NET framework & C#

The company offers cooperation with the leading aerospace industries in Europe, competitive salaries, a great working environment, and professional training to state of the art technologies. The open positions concern work in the company premises in Athens and/or in Europe.

Applicants should send their CV in English to hr@teletel.eu. For more information about the company please visit www.teletel.eu.
